## Minimum Construction Standards for Lattice

The Architectural Control Committee has adopted the following Minimum Construction Standards for Lattice:

1. Lattice may be used only when covered by plantings.
2. Installation of lattice shall not commence until obtaining the prior written approval of the Architectural Control Committee. (4.01)
3. Lattice may be constructed on the Lot after or while the Main Dwelling is being built. (3.01)
4. No Lattice shall be located over, under, upon, or across any portion of any utility or drainage easement. (2.04)
5. Lattice shall be located behind a line on the Lot set by the rear of the Main Dwelling.
6. Improvements to the Lot cannot interfere with the established drainage pattern over the Lot from adjoining or other Lots. "Established drainage" is defined as the drainage which existed at the time that overall grading of the Subdivision was completed by the Developer. (3.13a)
7. Improvements to the Lot must include finish grade of the Lot to establish good drainage from the rear of the Lot to the front street or from the building site to the front and rear of the Lot as dictated by existing drainage ditches, swales, and Lakes. (3.13b)
8. See Minimum Construction Standards – Rules & Regulations.

The Architectural Control Committee reserves the right to grant a variance from these Minimum Construction Standards.

These Minimum Construction Standards are effective upon recordation in the Public Records of Rockwall County, and supersede any guidelines or standards which may have previously been in effect. Except as affected by these Minimum Construction Standards, all other provisions contained in the Declaration of Covenants, Conditions and Restrictions for High Point Ranch - Sections One and Two or any other dedicatory instruments of the Association shall remain in full force and effect.

Per the Declaration of Covenants, Conditions and Restrictions for High Point Ranch, Article IV:

The sole authority for determining whether construction plans and specifications for proposed Improvements are in compliance with the provisions of the Declaration as to quality and color of materials, drainage, harmony of external design and color with existing and proposed structures, and location with respect to topography, finished grade elevations and other relevant factors, rests with the Architectural Control Committee. (4.01b)

The Architectural Control Committee may from time to time promulgate an outline of minimum acceptable construction standards. Such outline will serve as a minimum guideline only and the Architectural Control Committee shall not be bound thereby. (4.05)
